

As part of communicating & popularizing science among the visually impaired students. RVPSP has developed an audio series kit in Hindi titled "Socho... Samjho... Jaano" by an NGO SAMPARK, based in Haryana. The kit was released during the National Science Day Celebration held at Technology Bhavan on 28th Feb 2008.

**Hon'ble Minister of Science & Technology and Earth Sciences and Dr. M. S. Swaminathan releasing the Audio Series Kit.**

Each and every child is curious to know about all the things that happen around us. This series is being produced for acquainting them with the answers to some of the questions that cross their minds. Through this series we are trying to explain how things work in daily life and what is the science behind them. It has been our effort to present all the information as simple as possible. This kit includes-a set of two audio CDs, two audio cassettes, one Braille book and one book with large print.

**Shri Rakesh Andania, Sampark with the Chief Guests**

The need of the hour is to make people realize the importance of science in life. To spread the concept of scientific approach among the common masses, especially among the students, dedicated and well directed efforts are of prime need. We have to face many challenges while working in this direction. One such challenge is to develop the ability to understand the concepts of science with ease in visually impaired children. No doubt that this is a tough task, as visually impaired people understand things only by listening or touching.

**Hon'ble Minister of Science & Technology and Earth Sciences gifted the kit to visually impaired children**

The motive of RVPS is to bring these children into the mainstream and provide answers to all those queries that pop up in their mind.
