BRINGS NEWS ON S&T DEVELOPMENT FROM DST SUPPORT AND BEYOND

EDITORIAL

FROM HEAD OF DST MEDIA CELL

Challenging times bring out the best in us. This was proved once more as the scientific community braced itself to fight the COVID 19 crisis 'facing the country'. Scientists delving into the world of microbial life, micro matter, nano-materials, answering questions about life and matter, now focused on relevant solutions. The Department of Science and Technology (DST), its autonomous and attached institutions, scientists, S&T entrepreneurs, business incubators and industry joined hands to customize their existing R&D, technologies and innovations to meet the need of the hour.

A COVID-19 Task Force was set up in DST to identify technologies from R&D labs, academic institutions, startups, and MSMEs to fund nearly market-ready solutions for diagnostics, testing, health care delivery solutions, equipment and supplies. With overall direction and guidance from Secretary, DST, the team was mobilized in 24 hours and soon proposals for solutions started pouring in. Key autonomous institutions/Divisions of DST which contributed significantly to COVID-19 related R&D initiatives include; Technology Development Board (TDB), Science & Engineering Research Board (SERB), Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST), National Science & Technology Entrepreneurship Development Board (NSTEDB), Nano Mission, Science for Equality, Empowerment and Development (SEED) and International Bi-lateral Division. This newsletter puts together some of the fruits of the hard work that went into preparing for the battle against the pandemic.

COVER STORY

CHITRA GENELAMP-N MAKES CONFIRMATORY TESTS RESULTS OF COVID-19 POSSIBLE IN 10 MINUTES

Sree Chitra Tirunal Institute for Medical Sciences and Technology, Trivandrum, has developed a diagnostic test kit that can detect COVID-19 in 10 minutes, with sample to result time less than 2 hours. A total of 30 samples

can be tested in a single batch in a single machine allowing a large number of samples to be tested each day.

"Development of a novel, inexpensive, rapid confirmatory for the diagnosis of COVID-19 by Sree Chitra in record time is a compelling example of how a creative team of clinicians and scientists working together seamlessly can leverage knowledge and infrastructure to make relevant break throughs"

—Prof Ashutosh Sharma

DR HARSH VARDHAN LAUNCHES 'COVID INDIA SEVA', AN INTERACTIVE PLATFORM FOR CITIZEN ENGAGEMENT ON COVID-19

Union Minister of Health & Family Welfare, Dr Harsh Vardhan launched the COVID India Seva, which provided an interactive platform to establish a direct channel of communication with millions of Indians amid the pandemic. This initiative is aimed at enabling transparent e-governance delivery in real-time and answering citizen queries swiftly, at scale, especially in crisis situations like the ongoing COVID-19 pandemic. Through this, people can pose queries @CovidIndiaSeva and get them responded to in almost real time. @CovidIndiaSeva works off a dashboard at the backend that helps process large volumes of tweets, converts them into resolvable tickets, and assigns them to the relevant authority for real-time resolution.

DST'S COVID-19 COMBAT LEADERS

PROF. ASHA KISHORE

Prof. Asha Kishore, MD, DM, Director, SCTIMST

Prof. Asha Kishore is first woman Director of Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST), Trivandrum, an Institute of National Importance Govt. of India under the Department of Science and Technology (DST) has been instrumental in motivating her team of scientists to bring solutions to meet the COVID-19 challenge facing the country

One of the first Indian Neurologists to be trained in the subspecialty of Movement Disorders, at the University of British Columbia, Canada, she and her team established the first Comprehensive Care Centre for Movement Disorders in India at SCTIMST.

Her research contributions in understanding the long term outcome of deep brain stimulation in Parkinson's disease, the pathophysiology of levodopa induced dyskinesia, impulse control disorders in PD, pathophysiology of Writers cramp, plasticity of motor cortex in health, aging and movement disorders are substantial. She has also won several awards for outstanding performance in medicine from various agencies. She has been a constant encouragement to the team which worked on solutions for the COVID-19 crisis through the challenging times.

The task force team

DST set up a COVID-19 Task Force for mapping of technologies from R&D labs, academic institutions, startups, and MSMEs, and to coordinate the effort to find nearly market-ready solutions in the area of diagnostics, testing, health care delivery solutions, equipment supplies, etc. At DST, the team was led by Secretary, DST with Dr Neeraj Sharma, Dr Akhilesh Gupta, Dr Anita Gupta, Scientists G, DST; Prof Sandeep Verma, Secretary, SERB and Ms Anju Bhalla, JS, Admin as members. Dr Akhilesh Gupta was designated as DST's nodal officer on COVID-19 and Ms Anju Bhalla as the Nodal officer on COVID-19 related public grievances.

FEATURED INSTITUTION

Sree Chitra Tirunal Institute for Medical Sciences and Technology, Trivandrum

An Institute of National Importance under Govt. of India

Amid lockdown, SCTIMST gears up to meet COVID-19 pandemic with R&D, technologies & products

Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST) is an Institution of National Importance under the Department of Science and Technology, Govt. of India stood out with its research, technologies, and innovations to meet the need of the hour in India's fight against COVID-19.
